

Dr Miguel Teixeira

CEO, ClearX | Clear Aligner Orthodontics Specialist

Professional Profile

Dr Miguel Teixeira is a Portugal-based orthodontic specialist and the Chief Executive Officer of ClearX. He is internationally recognised for his dedication to clear aligner treatment, clinical excellence, education, and innovation in modern orthodontics. His work focuses on advancing predictable, patient-centred aligner therapies through evidence-based protocols and cutting-edge digital workflows.

Areas of Expertise

- Clear aligner orthodontics
- Digital orthodontic workflows
- Complex aligner case planning
- Clinical education and professional training
- Orthodontic innovation and product development
- Leadership in dental technology companies

Professional Experience

Chief Executive Officer – ClearX

As CEO of ClearX, Dr Teixeira leads the strategic, clinical, and educational direction of the company. He is responsible for driving innovation in clear aligner systems, supporting clinicians worldwide, and ensuring the highest standards of quality, predictability, and clinical support.

Orthodontic Clinician & Clear Aligner Specialist

Dr Teixeira maintains an active clinical focus on clear aligner therapy, treating a wide range of cases from mild to complex malocclusions. His clinical philosophy emphasises biomechanics, long-term stability, and patient-focused outcomes.

Education & Training

- Specialist training in Orthodontics
- Advanced education in clear aligner biomechanics and digital treatment planning
- Continuous professional development in orthodontic technologies and materials

Teaching & Speaking

Dr Teixeira is actively involved in teaching and mentoring orthodontists and dentists in clear aligner therapy. He regularly delivers lectures, workshops, and hands-on courses focused on aligner biomechanics, treatment planning, and clinical efficiency.

Innovation & Research

Through his work with ClearX, Dr Teixeira contributes to the development of innovative aligner materials, clinical protocols, and digital solutions aimed at improving treatment predictability and patient experience.
