

## Dr.Krasimir Zlatev DMD

Bulgaria , Varna

### CURRICULUM VITAE

Dr. Krasimir Zlatev is graduated in dentistry 1985 at Faculty of Dental Medicine of the Medical University in Plovdiv, Bulgaria. From 1985-1991 he worked in state practice. In 1991 he founded his own private practice. Today he is the owner together with his wife , daughter and son of a private family practice located in Varna. From 1999 – 2003 he participated in a periodontology and implantology qualification program by Prof. Marc Danan . Since 1999 he has been active member of BSPOI ( Bulgarian society of periodontology and oral implantology) and from many years is a member of management board .Over the years he has taken a series of courses on various topics like:

Periodontology, mucogingival surgery around teeth and implants by prof. Giovanni Zucchelli , BOPT ( Biologically oriented preparation technique) , soft tissue prosthetic management around teeth and implants by Dr. Ignazio Loi, MF Extrusion Technique, saving teeth by recreating biological width performing fast orthodontic eruption or augmenting bone and soft tissue by slow extrusion before placing implant avoiding surgery for bone and soft tissue augmentation Dr. Mauro Fadda, Surgical management of soft tissue in sites with bone augmentation as a key factor for success by Dr. Carlo Tinti. He is heavily influenced also from Prof. Paul Mattout regarding bone augmentation with GBR using Ti-PTFE membranes and blood clot alone , or autogenous bone shavings avoiding biomaterials. From 2019 Dr. Zlatev is focused on BBA (Biological bone augmentation) starting with in person course by Dr. Frank Zastrow in Heidelberg, Germany. Then he completed Elite and

Expert Masterclasses about BBA concept by Dr. Frank Zastrow and become Co-Instructor in MIB( My Implant business) educational platform. Since 2021 he is performing SBBT(Split bone block technique) by Prof. Fouad Khoury and SLT( Semilunar technique) by Dr. Frank Zastrow, both biological techniques for bone augmentation using only autologous bone. Another biological technique that he now applies in his practice is IDR ( Immediate dentoalveolar restoration) by Dr. Jose Carlos Da Rosa. Graft less solutions for sinus, Prof. Stefan Lundgren and autologous growth factors from patients blood Prof. Dong -Seok Sohn and Prof. Ioannis Georgakopoulos are also included in the methods he applies. Inspired by the good experience with biological techniques , Dr. Zlatev 's current goal is to combine the power of all of them and to establish decision three how to treat patients more biologically.
