

Hammaste trauma ja autotransplantatsioon

Toimumisaeg: 18.11.2023

Toimumiskoht: Swissotel Tallinn (Tornimäe 3, Tallinn)

Lektor: Mitsuhiro Tsukiboshi (D.D.S., PhD, Japan)

Korraldaja: dental education OÜ

Osavõtutasud:

Kuni 15.09.23 - 450€.

16.09.23 - 01.11.23 - 500€

02.11.23 - 17.11.23 - 550€

Kirjeldus: 8 TP

Keel: inglise keel

Registreerumine: www.dentalep.ee,

Kava:

I Osa 1:10:00 - 13:00 /Ravi planeerimine hammaste trauma korral

II Osa: 14:00 - 17:00 /Hammaste autotransplantatsioon

III Osa: 17:00 - 18:00 /Q&A

MITSUHIRO TSUKIBOSHI

Dental trauma and Autotransplantation

Treatment planning for traumatized teeth

Dental trauma is an acute disease involving the hard tissues, the pulp, and or the periodontium, and is more frequently seen in young people. Since infection is seldom associated with traumatized teeth, treatment options can be conservative. In other words, in dental trauma, pulpotomy is preferred over pulpectomy, simple composite restorations over complex prosthetics, and replantation over extraction.

Autotransplantation of teeth

Complex treatment plans in implant often include situations where the choices of autotransplantation of teeth have been overlooked. If recipient sites are jeopardized for placing implants, more time, cost and techniques are required. However, if there is a good candidate as a donor tooth found in the same mouth, transplantation can be a more appropriate option than implant.

Dr. Mitsuhiro Tsukiboshi

D.D.S., PhD, Nagoya, Japan

Dr. Tsukiboshi is a graduate of Osaka University School of Dentistry in 1976. He earned a PhD in dental materials from Kyoto University in 1980 and has been engaged in private practice since 1981. Dr. Tsukiboshi's interest in dental traumatology and autotransplantation has led to extensive clinical involvement, course presentations and publications. Dr. Tsukiboshi has lectured extensively on dental trauma and autotransplantation; he has authored many articles and two textbooks, one on dental trauma in 1998 and one on autotransplantation in 2000. The books have been published in several languages, including English. Dr. Tsukiboshi is a visiting lecturer at Osaka University and Loma Linda University since 1998 and is the President of the International Association of Dental Traumatology in 2009 and 2010. Dr. Tsukiboshi is certified as an adjunctive assistant professor of Western university in USA in 2012 and a clinical professor of the dental school of Tohoku University from 2015-2018.
