

Certification course

Ordoline Academy - Advanced

Our advanced certification course provides further guidance for doctors who have already begun their journey working with the Ordoline aligner system and would like to strengthen their skills and knowledge further.

This course will enable the range of treatments offered with our therapy to be expanded, with participants learning how to:

- Make a diagnosis in challenging treatment cases;
- Treat complex cases in an efficient manner;
- Analyse a patient's smile aesthetics and prescribe the appropriate orthodontic treatment;
- Thoroughly assess treatment plans and request amendments if needed;
- Manage skeletal anchorage and use our surgical guides.

Participants will also:

- Be equipped with tips for enhancing treatment planning;
- Communicate with Ordoline dental technicians;
- Understand the underlying biomechanics of aligner therapy;
- Learn about advances in orthodontic retention;
- Acquire skills regarding marketing strategies and ways to attract and retain patients;
- Learn about clinic management.

This academy is taught as a **full-day, live course**.
