

Certification course

Ordoline Academy – Essentials

Our essential certification course offers an onboarding course for doctors who wish to become certified Ordoline partners. The course introduces our aligner orthodontics and provides the fundamental practical skills and knowledge required to successfully implement our aligner therapy.

After successful completion of this course, participants will understand the following:

- Why doctors and patients should choose treatment with aligners;
- How our teeth straightening system works;
- What aligner treatment indications and Ordoline treatment typologies are;
- How to conduct the initial consultation with the patient, define the problem, and make an informed diagnosis;
- How to capture and manage patient data on the Ordoline platform;
- How to manage clinical and digital workflows;
- How to define treatment objectives and write a prescription;
- How to place attachments, apply orthodontic auxiliaries, conduct intermediate check-ups and manage retention;
- How to manage and complete our aligner treatment.

This academy is taught as a **full-day, live course** alongside a practical session. Live events will be held in English language.

This program also includes **6 webinars**. You can participate in separate webinars or subscribe to entire Ordoline Academy-Essentials webinar series. All webinars will be held in English.

For more information and upcoming live event dates in Estonia and webinar sessions please contact our representative:
