

Theoretical seminar for dentists

Speaker: **prof. Camillo D'Arcangelo** (Italy)

## **No-Prep rehabilitation: stop to prepare the teeth!**

The right way to obtain the esthetic and occlusal success with no-prep or minimally invasive preparations

Introduction of the new "Micerium" Enamel Plus HRi BIO Line products which are Bis-GMA free and Bisfenol-A free

**2018 May 12 d. (Saturday) Kaunas**

**Event location: EUROPA ROYALE KAUNAS HOTEL, Miško st. 11, Kaunas**

**PROGRAM:**

**8.00 - 9.00 Registration**

**9.00 - 11.00 Restorations in ANTERIOR teeth (Part 1)**

What does esthetics mean in dentistry?

The concept of "ADDITIVE" prosthodontics

The advantages of "ADDITIVE" prosthodontics compared to traditional prosthodontics

Esthetics evaluation and treatment plan

Esthetics evaluation of soft tissues

Restorative materials: selection criteria between composite and porcelain

Wax-up and Mock-up techniques

Minimally invasive composite or porcelain veneers preparation: principles and techniques

No-preparation veneers (CH additive veneers): principles and techniques

Impression taking: techniques and materials

**11.00 - 11.30 Coffee Break**

**11.30 - 13.30 Restorations in ANTERIOR teeth (Part 2)**

Luting procedures: the proper selection of materials and techniques

Clinical steps for effective finishing and polishing procedures

Composite Palatal veneers: when and why

Restoration and gingival profile maintenance over time

Clinical cases discussion

**13.30 - 14.30 Lunch Break**

**14.30 - 16.00 Restorations in POSTERIOR teeth (Part 1)**

Occlusal evaluation and treatment plan

"Occlusal Balance" concept

Restorative materials: selection criteria between composite and porcelain

Minimally invasive tooth preparation for composite onlays and overlays: principles and techniques

Adhesive procedures: selection criteria between total-etch and self-etch approaches

Impression taking: techniques and materials

**16.00 - 16.20 Coffee Break**

**16.20 - 18.00 Restorations in POSTERIOR teeth (Part 2)**

How to obtain the same Lab precision and esthetic with "in-office" technique for composite onlays and overlays

Operative procedures for a successfully *in-office* restoration manufacturing, according to the "CDA OFFICE MADE TECHNIQUE"

Luting procedures: the proper selection of materials and techniques

Clinical steps for effective finishing and polishing procedures

Restoration maintenance over time

**18.00 - 18.30 Questions and discussion**

Chieti university

### Prof. Camillo D'Arcangelo CV

Full Professor in Restorative Dentistry at the University of Chieti, Italy.  
Dean of the Department of Restorative Dentistry and Dean of the greatest Department of the University of Chieti.  
Dean of School of Specialization in Pediatric Dentistry of University of Chieti

His clinical and research qualities, together with his didactic skills, are internationally recognized. He is an invited speaker in the most prestigious International Congresses and he is the scientific, he is didactic coordinator of several activities involving different International Universities and invited Professor in several international universities. He has been honorary professor at the Ukrainian Academy of Medical Stomatology since 2006 and member of the most eminent international scientific associations in the field of Restorative Dentistry and Adhesive Prosthodontics.

Over the years, he has been practicing very high-level clinical activities, together with his own clinical Staff, setting-up within the University of Chieti one of the worldwide most advanced center in the field of Restorative Dentistry, Adhesive Prosthodontics and Occlusal Problems.

In parallel with the clinical activities, at the University of Chieti he coordinates a dynamic research group, that has become over the years a reference point in Europe for the biomechanical studies on dental materials employed in Restorative Dentistry and Adhesive Prosthodontics and is particularly interested in the materials to be used for the full mouth rehabilitation of patients with parafunctions or TMJ disorders. His clinical and scientific knowledge about the problems, the procedures and the materials related to the oral rehabilitation of parafunctional and dysfunctional patients led to the publication of a textbook titled "E.F.P. (Esthetical-Functional-Postural) Clinical Approach" (ACME edition), together with Dr. Lorenzo Vanini.

He is also author of another very successful volume published together with Macij Zarow, Gaetano Paolone, Gianluca Paniz and Luis Felipe translated in English, Polish, Russian and Portuguese: "Endoprotetica" Ed. Quintessence.

He published more than 100 papers on the most prestigious national and international journals
